Search Tips

Capitalization

Keyword searches are not case-sensitive. Capitalization does not matter. Searching for *civil war* is the same as searching for *Civil War*.

AND Searches

A space between keywords is equivalent to the word *and*. For example, entering the phrase *civil war* is like saying, *civil and war* (but not necessarily next to each other)."

Phrase Searches

To search for an exact phrase, enclose the phrase in quotation marks. For example, entering the phrase "*civil war*" exactly as it appears between the quotes.

Combinations

The above methods can be combined to help refine your results. For example, a phrase search can be combined with a keyword search. This would display all titles that contain the phrase *civil war* and the keyword *lincoln*.
